# Introduction

If you want to be in business for the long run and stay relevant, you are going to need to keep tabs on the social media landscape and join social networks that are going to take you into the future. That's exactly what Snapchat does. This platform is one of the social media outlets that have come from a constantly evolving world of social media and it uses a novel and never-before-seen method of communicating – a way of communicating that shows where the future of social media is headed.

## **Snapchat Is All about the Next Generation**

Do you want one really great reason to join Snapchat? There are way more than one but if you need just one, think about the fact that Snapchat has become one of the most popular social media applications for people aged 12 to 24 years old. As you can see, that means that the next generation of buyers and the generation after that are all going to be potential Snapchat veterans and if your brand is on Snapchat and has been from the beginning, there is a good chance that you're reaching a lot of these young people.

## **Snapchat Creates Excitement**

Another great reason to join is that the way that Snapchat works is extremely fun and promotes serious interactivity between users. Snapchat is an exciting way to use social media and brands are capitalizing on these young people's desire for exciting content by providing them with things like behind-the-scenes information about an event or brand, special promotions, discounts or giveaways that they couldn't find out about from any other source. Because of the way that information is communicated and how quickly it disappears, Snapchat promotes excitement with every single post.

## **Snapchat Can Increase Your Online Presence and Gain You New Followers**

Snapchat is also a great way to increase your online presence. You may already have profiles on websites like Twitter and Facebook, and you probably have a Pinterest account and other social media as well. But whenever you join a major social media network you're going to be expanding your online presence and you will gain followers all around as a result, as well as retain followers better on your other social media networks. In fact, you will have a significant number of people coming to follow you on Snapchat from your other social media profiles as well as having people find that your Twitter and Facebook because they followed you on Snapchat.

No matter how you slice it, Snapchat is one very possible future of social media. Making sure that you are prepared for the next generation of buyers is something that every business should be doing and when you see a social media platform like Snapchat that is gaining popularity so fast – to the tune of 200 million active users per month – you need to get involved as quickly as possible and start using it to build your business even bigger.
